

# Manual Force Testing Instrument

Ideal for simple tests together with the force gauge DFC

Easy-to-use force test bench together with DFG or DFC force gauge. Force range in three versions: 500, 1500 and 2500 N. Very good dosing of the manual force transmission by lever or handwheel. Inexpensive solution for incoming goods and production.

## The Advantages in detail:

- Tensile or compression test
- Equipment with DFC hand tool
- Precise mechanics
- Optionally with odometer
- Various clamping tools available
- Ideal for production use
- Convertible for horizontal use
- Robust design
- Incl. transport case

Model	MTL-110	MTL-330	MTH-550
Nominal load	500 N	1500 N	2500 N
Cross-slide path	150 mm	100 mm	100 mm
Travel per revolution	76 mm	76 mm	0,76 mm
Blockable	X	X	X
Vertical test path	Standard	Standard	Standard
Horizontal test path (convertible)	X	X	
Screwable with work surface	X	X	X
Connection thread for clamping tools	M6	M10	M10
Span	150 mm	100 mm	100 mm
Operation	Levers	Levers	Handwheel
Adapter set for clamping tools	X	X	X
